Project duration:

26. - 27.05.2011

Why do you think this project is necessary for your community or your organisation?

-Our volunteers will make some creative work in our yard, we will help kids from the local kindergarten by making their environment cleaner, funnier and much more safe for them! We will, also, repair old benches in the same yard, we will plant some flowers outside and remove all that wild plants. The yard is our common yard and our interest is to make it much more comfortable... We will bring the tools we need for the project from our homes. This project will, also, help our volunteers to make some money for our summer – trip to Prvić island!

What do you expect from this project?

I expect that youth are going to be more interested in volunterism, in their local society's problems and I want to share their ideas for the future! We have new organisation in our town, and this is that one, we should make progress in this town!
